Work Experience

Founding Product Designer (UI/UX & Front-end)

09.2024 – 08.2026 / Full-time **Swiftfood Ltd** **London, UK**

Merchant & Multi-Sided Delivery Platform

- **Design System & Engineering Collaboration:** Led end-to-end design across consumer, merchant, and courier apps, building a shared design system with tokens and working closely with engineers to ensure consistent, scalable, and pixel-accurate implementation.
- **Multi-role Product Architecture:** Designed a unified merchant experience combining operational and management functions, simplifying workflows for small vendors and reducing system fragmentation.
- **Launch & Optimisation:** Contributed to product launch and iterative improvements, supporting early growth to 500+ orders in the first month and £7,000 GMV within three months.
- **AI-assisted Design & Development:** Used tools such as GPT and generative prototyping platforms (e.g. Google AI Studio) to support ideation, rapid iteration, and early-stage UI exploration.

Co-founder / Health Tech App

04.2024 - 07.2024 **London, UK**

GLOCOY: AI-powered Support for Gestational Diabetes (GDM)

- **MVP Definition & AI Prototyping:** Co-founded an AI-powered SaaS platform for Gestational Diabetes (GDM), defining product direction and building early-stage prototypes using AI-assisted tools to explore solution concepts.
- **User-Centric Validation:** Validated the value proposition through in-depth interviews with **20+ patients**, translating clinical needs into an AI-driven meal planning feature set.

UX Researcher & Designer

10.2020 - 12.2021 / Full-time **Tsinghua University** **Beijing, China**

Xiaomi &Toyota Joint Research Fund

- **Interdisciplinary Strategy:** Collaborated with IoT interdisciplinary team to address communication conflicts in shared housing; conducted mixed-method research (30 interviews, 200+ surveys) and SPSS analysis to define user personas.
- **Affective Computing & Prototype:** Designed and delivered an emotion-sensing lighting system and app based on Xiaomi's ecosystem; integrated hardware inputs with user-centric UI to validate emotional feedback mechanisms.

Education

Royal College of Art

MDes Design Futures

2023 – 2024 **London, UK**

Focus on System Design, Strategic Foresight & Prototyping.

Beijing Forestry University (Top University in China)

BEng Wood Science and Engineering (Furniture Design & Manufacture)

2016 – 2021 **Beijing, China**

Engineering-based Design Education with Material & Manufacturing Focus

Skills

Design & UI Craft

Figma (components, auto layout, design tokens), Adobe Creative Suite

AI-assisted Workflows

Claude (code generation), generative prototyping tools

Technical Foundations

HTML, CSS, JavaScript

Language

English
Mandarin

Hobbies

Certified Table Tennis Umpire (England Table Tennis Association)
Chinese Calligraphy Practitioner
